## PROFESSIONAL SUMMARY

Results-driven AI Engineer and Data Scientist with 5 years of combined experience in software engineering and AI/machine learning research. Proven track record in developing and deploying data-driven solutions, large language models, and full-stack applications. Adept at collaborative and independent research, with a focus on NLP, deep learning, and big data analytics.

## EDUCATION

|   |  |
|---|--|
| <b>National University of Singapore</b><br><i>Masters in Computing: Artificial Intelligence specialization</i>  | Singapore<br>Jan. 2022 – Dec. 2023     |
| <b>SRM Institute of Science and Technology, Kattankulathur</b><br><i>Bachelor of Technology in Computer Science and Engineering, Percentage: 84.03%</i> | Chennai, India<br>Aug. 2015 – May 2019 |

## WORK EXPERIENCE

|   |   |
|---|---|
| <b>Research Engineer – Data Science</b><br><i>Nanyang Technological University Singapore</i>  | May 2024 – Present<br>Singapore           |
| <ul style="list-style-type: none"><li>Developed advanced data mining techniques for analyzing text, stickers, images, and videos on Telegram, improving data extraction and analysis efficiency.</li><li>Engineered large language models (LLaMA) to predict user roles and information dissemination patterns, enhancing the understanding of user behavior.</li><li>Collaborated with multi-disciplinary research teams to deliver successful project outcomes while independently managing key tasks.</li></ul>  |   |
| <b>Research Assistant Intern</b><br><i>NUS Human Computer Interaction Lab</i>   | Jul 2022 – Nov 2023<br>Singapore          |
| <ul style="list-style-type: none"><li>Conducted experiments on Project Eye Gaze, analyzing large datasets to improve eye-gaze pattern recognition with a 99% accuracy rate.</li><li>Performed comparative analysis of machine learning models and neural network architectures to refine eye-gaze recognition.</li></ul>  |   |
| <b>Software Engineer, Research and Development</b><br><i>Hewlett Packard Enterprise</i>   | Aug 2019 – Oct 2021<br>Bengaluru, India   |
| <ul style="list-style-type: none"><li>Led the development of StoreEasy Management Console (SEMC), improving software quality by 15% across 4 support program releases and reducing post-release bug reports by 34%.</li><li>Engineered ETL pipelines and reusable UI components in React/Node.js, enhancing system robustness and user experience within cross-functional teams.</li><li>Implemented Agile methodologies and CI/CD practices using GitHub and Jenkins, which resulted in a 40% reduction in time-to-market and increased international user engagement.</li></ul> |   |
| <b>Software Engineer Intern – Full Stack</b><br><i>Hewlett Packard Enterprise</i>   | Jan. 2019 – Jul. 2019<br>Bengaluru, India |
| <ul style="list-style-type: none"><li>Designed and developed UX interfaces for SEMC, achieving 100% backlog defect clearance.</li><li>Leveraged tools like Pytest for unit testing and Grafana/Kibana for monitoring, ensuring high-quality software releases.</li></ul>  |   |
| <b>Web Development Intern</b><br><i>Webnish Software Solutions Pvt Ltd</i>  | Jun. 2017<br>Bengaluru, India             |
| <ul style="list-style-type: none"><li>Engineered an Interactive blog platform using Atom with a 40% faster deployment rate than comparable projects.</li><li>Implemented user authentication functionalities, enhancing user engagement and trust.</li></ul>  |   |

## RESEARCH AND PROJECT EXPERIENCE

---

### **Generative AI self introduction APP**

Dec 2023 – Jan 2024

- Developed an RAG pipeline for a self-introduction app using LangChain and OpenAI API for personalized language generation.
- Integrated TensorFlow for language model optimization and StreamLit for user-friendly GUI design.

### **Eye-gaze Pattern Recognition, Thesis**

Jan 2023 – Nov 2023

- Innovated a 98% accurate eye gaze recognition quantitative model using graph neural networks and dynamic programming.
- Executed novel data processing with a 10-gesture dataset, demonstrating a superior accuracy of 97.67% compared to existing models(ANN, CNN, GRU, LSTM, and GCN), in pytorch.

### **Big Data News Popularity Analysis**

Jul 2022 – Nov 2022

- Conducted analysis on 90,000 news items from diverse outlets to assess popularity across social media platforms.
- Utilized sentiment lexicon, clustering, and word frequency analysis to gauge news sentiment and identify trending topics.
- Generated visualizations of sentiment scores, clustering results, and popularity statistics across different social media platforms.

### **Improved Colour Texture Based Face Spoofing Detection, Thesis**

Aug 2018 – May 2019

- Devised facial fraud detection strategy using component characteristic study and extensive datasets.
- Conducted feature extraction methods(CoALBP, LBP, LPQ, BSIF) and SVM for cluster identification, visualized on MATLAB.
- Conducted quantitative image analysis, published paper in International Journal of Engineering and Advanced Technology, 2019.

## CERTIFICATIONS

---

- Microsoft Azure Fundamentals
- Microsoft Azure AI
- Data Science and Artificial Intelligence (ACM)
- Applied Machine Learning in Python (Coursera)
- Introduction to Data Science in Python (Coursera)

## TECHNICAL SKILLS

---

### **Languages:**

Python, SQL, MongoDB, JavaScript, HTML/CSS

### **Frameworks:**

React, AngularJS, PyTorch, TensorFlow, Keras, Spark, Hadoop, RESTful APIs

### **Developer Tools:**

Git, Jenkins, Jira, Docker, Kubernetes

### **Libraries:**

Pandas, NumPy, Scikit-Learn, NLTK, Spacy, Seaborn, Plotly, Streamlit

### **AI/ML & Cloud Computing:**

Azure AI, Azure SQL Database, AWS Cloud, NLP, Deep Learning, Computer Vision, Large Language Models (LLMs)
